Experiences in the midst of nature
Explore every shade of green

Come and visit one of Europe’s best preserved Atlantic coastal forests. It extends over 9000 hectares, yet is home to just 500 people, which gives an idea of the virgin state of the woodland that follows the course of the River Eume. The Park is triangular in shape and it is bordered by the towns of As Pontes de García Rodríguez, Pontedeume and Monfero. The 100 km long River Eume carves out a deep canyon from the steep slopes covered in a spectacular blanket of vegetation. Oak and chestnut are abundant and accompanied by other varieties such as birch, alder, ash, yew, hazel, wild fruit, laurel, holly and strawberry trees. Its humid, shady riverbanks are home to a collection of more than 20 fern and 200 lichen species. A simple stroll will turn into a true exploration of this magical forest.

ACCESS:
The most common way of reaching the Park is from the town of Pontedeume, taking the AC-114 or the DP-6902 road, both in the direction of Caaveiro monastery. Car access to the Fragas do Eume Natural Park is restricted, and parking in the proximity of the monastery is recommended.

A journey through more than 1000 years of history visiting the River Eume’s monasteries.

FROM CAAVEIRO TO MONFERO

From Pontedeume, following the river along the Ombre fishing reserve, it is a 15-minute walk from the parking area to the San Xoán de Caaveiro Benedictine monastery. Entrance is free and includes a guided tour. We recommend calling beforehand as opening times vary throughout the year. In the summer season, vehicle access is restricted, although there is an organised transport service that will take you close to the monastery.

Monfero’s monastery, in San Fiz parish and of Romanesque origin, hides a magnificent Baroque church with a chequered slate tile façade. Both buildings bear witness to the repercussions of the discovery of the Apostle St. James’ tomb, which brought the main monastic orders to the region, leaving their mark on monasteries, churches and other religious buildings.
Discover the pleasure of losing yourself all the while knowing exactly where you are going.

HIKING ALONG THE EUME

The best way to discover the Park is by walking along any one of a number of trails, which make up 8 routes with 60 kilometres of signposted trails. Os Encomendeiros route takes us to the Cal Grande and Fornelos hanging bridges, as well as to Caaveiro and the Santa Cristina medieval bridge. If you would like to enjoy one of the best views of the Fragas do Eume, we recommend following the Os Cerqueiros route, where you can take in the view from A Carboeira vantage point.

Parques Naturais de Galicia
Baixa Limia
Serra do Xurés

Galicia’s largest Natural Park, which also forms part of the border with Portugal. Rugged granite mountains and magnificent stone boulders make it different from other protected areas. It also has many megalithic monuments and bears witness to the passage of the Roman legions along the XVIII road, also known as Via Nova.

Parques Naturais de Galicia
Complexo dunar de Corrubedo e lagos de Carregal e Vixán

North-western Spain’s largest mobile dune, more than 1 km long, 250 m wide and 20 m high. Vixán freshwater lake and Carregal saltwater lake, which merges with the sea, are of special interest.

Parques Naturais de Galicia
Serra da Enciña da Lastra

The holm oak, a tree typical of Mediterranean climates, and its 25 different species of orchid have made this Park exceptional within the Galician landscape. It is well known to speleology lovers, given the number of caves known here as ‘palas’.

Parques Naturais de Galicia
Monte Aloia

Galicia’s first Natural Park to undergo tailored reforestation at the hands of the engineer Rafael Areses. Legend has it that this is Monte Medulio, the scene of the collective suicide of Celtic tribes in order to avoid falling into the hands of the Roman invaders.

Parques Naturais de Galicia
O Invernaideiro

A natural area with no human settlements in the immediate surroundings. Nature in its wildest state represented by the wolf, which lives alongside its main prey, such as roe deer and boars. Its rounded peaks share a space with a surprising glacial cirque and spectacular waterfalls.
